Tolee — Platform & Architecture Overview

Tolee = Group • Har post mein Tolee zaroori hai

1. What is Tolee?

Tolee (derived from the Hindi word "*टोली*" meaning crew, tribe, or community) is a community-first **hyper-local social networking and creator super-app**. Unlike traditional global platforms that isolate interactions to personal feeds, Tolee organizes social conversations, multimedia content, commerce, and updates around dedicated local groups and communities.

2. How It Works (Workflow & Data Flow)

1. **User Onboarding & Verification:** Users join via multi-factor authentication (email/mobile OTP) with role-based profiles (members, creators, sellers, admins).
2. **Community Anchoring (Tolees):** Every discussion, post, and content item is anchored to a relevant community or topic, ensuring localized relevance.
3. **Hyper-Local Discovery:** Real-time geolocation feeds pinpoint nearby activities, news, deals, and events within a user-customizable radius.
4. **Real-Time Interaction:** Real-time WebRTC streams, group audio/video meetings, and instant messaging enable direct member-to-member engagement.
5. **Monetization & Credit Ledger:** Users and creators earn reward credits, receive subscriber payments, and manage payouts directly through an integrated wallet.

3. Key Modules & Capabilities

1 Groups & Communities (Tolees)

The core building block of the platform. Users create, manage, and join public or invite-only community hubs categorized by interest, profession, or geographic neighborhood.

2 Feeds, Reels & Stories

Rich multimedia content consumption featuring standard algorithmic feeds, vertical short-form Reels, and ephemeral 24-hour Stories with high-performance video delivery.

3 Radar (Hyper-Local Discovery)

A location-aware engine connecting users with their immediate surroundings: local trending news, food spots, merchant deals, urgent community alerts, and local events.

4 Live Streaming & Communications

Low-latency interactive live broadcasts, virtual community town halls, and 1-on-1/group calling infrastructure powered by scalable WebRTC pipelines.

5 Marketplace & Local Commerce

Integrated merchant storefronts and peer-to-peer listings allowing local businesses to showcase products, collect verified reviews, and process inquiries.

6 Creator Economy & Tolee Credit

Comprehensive monetization system supporting creator tiers, paid tier subscriptions, referral commission payouts, and direct bank account withdrawals.

7 Tolee Screen & Songs

Dedicated digital media streaming ecosystem featuring long-form video channels, creator studio dashboards, curated music playlists, and audio tracks.

8 AI Tools & Automation

Built-in assistive tools including agentic short-form video generation, intelligent resume creation, smart post drafting, and automated promotional messaging.
